## **Curriculum Vitae**

Marina Pantazidou is an Assistant Professor at the National Technical University of Athens and its representative to the Technical Committee “Terminology Principles” ELOT/TE21, which is supported by the Technical Chamber of Greece.

Apart from university appointments in the USA (Carnegie Mellon University, Pittsburgh, PA) and Greece, her professional experience also includes work in Hazardous Waste consulting.

Her research interests include (1) environmental geotechnics with emphasis on numerical, physical and analytical modeling of nonaqueous phase liquid (NAPL) flow, (2) decision support methods for environmental decision making and (3) engineering education.
