

ELETO

HELLENIC SOCIETY FOR TERMINOLOGY
ΕΛΛΗΝΙΚΗ ΕΤΑΙΡΕΙΑ ΟΡΟΛΟΓΙΑΣ

Brief Annual Report for 2018

During 2018, ELETO's [boards](#) [*Administrative board of ELETO (DS) and General Scientific Board (GESY)*] had 22 meetings either, in which they examined various terminology matters. Specifically, GESY studied, validated and approved a large number of Greek terms or Greek equivalents of English terms, subsequently published in ELETO's newsletter "[Orogramma](#)" (issues No 148 to No 153) and inserted in the [English-Greek Glossary of Terms "Terms on Fora"](#) (16th edition). On board member elections (7 May 2018) new board members were elected.

ELETO continued cooperating with Termnet according to the ELETO–TermNet Memorandum of Understanding signed in 2013, offering *terminology terms* from its [TERMTERM termbase](#) to the [TermTerm termbase](#) the latter initiated by the "[TermTerm consortium](#)". Besides TERMTERM, ELETO continued offering terms from two other termbases, [TELETERM](#) (*telecommunications*) and [INFORTERM](#) (*information technology*) as well as various [glossaries](#).

During 2018, the following glossaries were created and uploaded on ELETO's site:

- a. [General and special terms in the field of Terminology \(GR-EN-FR\)](#) (Edition 6)
- b. [English–Greek glossary of geological terms \(Edition 9\)](#)
- c. [General and special terms of optics and lasers – EN-GR and GR-EN glossaries](#)
- d. [English–Greek glossary of terms and phrases for bidding procedures](#)
- e. [English–Greek glossary of basic SI units and their multiples and submultiples](#)

In 8 November 2018, [ELETO](#) in cooperation with the [Technical Committee ELOT/TE 21 "Terminology – Language Resources"](#) and the [Hellenic Network for Terminology \(EDO\)](#) organized a workshop titled "[Terminology and terminology resources – The requirements for modern Greek scientific terminology and the need to activate experts](#)". The purpose of the event was to present general issues related to Terminology based on the organizers' experience with terminology activities and, above all, to discuss the problems/needs specially in scientific terminology including proposals for cooperation/coordination of scientific and professional operators and for utilization of the terms that have been produced or are continuously produced in the context of Greek standardization activities.
